

Emanuele Fabbiani

Researcher • Entrepreneur • Engineer

emanuele.fabbiani@gmail.com | <https://www.linkedin.com/in/emanuelefabbiani>

SKILLS

Core skills	Data science, machine learning and deep learning for tabular data, time series forecasting, software engineering, and AI engineering.
Technical skills	5+ years: Python, Python data science ecosystem (pandas, polars, scikit-learn, XGBoost, PyTorch), Google Cloud Platform, ML system design and development. 2+ years: GenAI system architecture and development.
Soft skills	Entrepreneurship, public speaking, project management up to EUR 3M, group management in academia and business, and teaching.

EXPERIENCE

Co-founder, CEO, and Head of AI

2018–current

xtream | Milan, Italy

xtream was a consulting company building digital products and AI solutions for scaleups and corporates. Bootstrapped the company with four partners and grew it to over **EUR 2M** in annual revenue and **EUR 500K** in profits within 7 years. Built and led a **9-person AI team**, recruiting 3 PhDs and 2 university professors across Italy and Argentina. Launched the GenAI Adoption business line, generating **EUR 250K** in additional revenue in 15 months with a **60% profit margin**. Appointed CEO in 2023, driving a doubling of revenues within two years. In 2025, xtreame was acquired by TeamSystem, a company with EUR 1.1B in revenues backed by CapitalG and the Abu Dhabi Investment Authority.

Financial index forecasting

Machine learning, time series forecasting, Python, scikit-learn, XGBoost, Azure, Databricks

Led a team of 5 data scientists in the design and implementation of models to forecast financial indexes from macroeconomic variables. Implemented ingestion, preprocessing, training, and prediction on Azure Databricks and Data Factory. On a subset of the indexes, models outperformed the market and were used to support investment decisions.

Power load forecasting

Machine learning, time series forecasting, Python, scikit-learn, project management

Led a team of 4 data scientists and data engineers from presales to deployment. Achieved an average Mean Absolute Percentage Error (MAPE) **25% lower** than the previous production system, delivered result-sharing presentations to top management, and was asked to enable use of the new models before deployment.

AskHR

GenAI, RAG, LangChain, OpenAI, Python, Qdrant

Led a team of four engineers from presales through deployment to develop a Retrieval-Augmented Generation system that answers employee questions on HR policies. Built in close collaboration with the HR team of Europe's largest paytech company, the solution is now used by all Italian employees and reduced HR ticket volume by **30%** within the first two months.

Co-founder, CEO

2024–2025

Reaidy | Milan, Italy

Co-founded and led the early development of Reaidy, an enterprise copywriting platform. Led prototyping, prototyping, and delivery of initial product demos; secured the first clients; and generated **EUR 230K** in revenue in the first year. Reaidy was acquired by TeamSystem in 2025.

Data Scientist

2015–2017

Techedge | Milan, Italy and Madrid, Spain

Held this role as a part-time employee while attending MSc lessons. Achieved a 100% success rate in the projects I participated in and helped grow one customer team from 2 to 8 people.

Data Scientist

2015–2017

Statwolf | Dublin, Ireland and Pavia, Italy

Started as a summer intern in Dublin, then held a part-time remote collaboration. Delivered an analysis on the effect of weather conditions on the semiconductor manufacturing process. The results were praised by the customer and led to follow-up contracts for the company.

LECTURING

Catholic University of Milan

2025–current

Professor for the class “Practical AI” in the Master of Science in Management & Innovation. Received 8.4/9 in student satisfaction in the first year.

Catholic University of Milan

2024–current

Member of the academic board for the master’s degrees in Economics and Statistics.

University of Pavia

Proposed, designed, and lectured 3 editions of the short course “Python for Data Science” and 2 editions of “Python for Data Analytics”. Sold out 5/5 editions and received 100% positive or very positive feedback in surveys. Held the Machine Learning class in the Master’s in Statistical Genomics.

Almo Collegio Borromeo, Pavia

Held “Introduction to R Programming” and “Introduction to Machine Learning”.

EDUCATION

PhD in Applied Machine Learning

2018–2021

University of Pavia, Italy and EPFL, Switzerland

Completed while building xstream. Tutors: Prof. G. De Nicolao (University of Pavia) and Prof. G. Ferrari-Trecate (EPFL).

- Developed natural gas demand forecasting models adopted by A2A, Italy’s third-largest utility.
- Introduced a novel Bayesian approach to power grid identification, later built upon by research groups at EPFL Lausanne, ETH Zurich, and UC Berkeley.
- Published 9 papers in peer-reviewed international journals and conferences, including IEEE Transactions, receiving 156 citations.

Master of Science in Embedded and Control Systems

2015–2017

University of Pavia, Italy. Graduated cum laude.

Bachelor of Science in Computer Engineering

2012–2015

University of Pavia, Italy. Graduated cum laude.

VOLUNTEERING AND PUBLIC SPEAKING

Mentor at Lead the Future

Selected to mentor bachelor’s and master’s students interested in careers in STEM.

Speaker and Track Organiser

Since 2023, delivered 50+ talks at major technical conferences across Europe, including PyData Paris, PyData Berlin, PyData Milan, Swiss Python Summit, Codemotion, WeAreDevelopers Berlin, AMLD Lausanne, ODSC London, PyCon Italy, PyCon Germany, and the Insurance Data Science Conference in London. Since 2022, organised and hosted conference tracks and workshops at AMLD Lausanne, Europe’s leading applied AI conference.
